

Important news for people who use oxygen at home

Please help us to help everyone who relies on oxygen at home, especially during the cold winter months, by returning all your used and unwanted oxygen cylinders and headsets.

Please return them to the pharmacy that they came from. Or if that isn't possible, then please return them to your local pharmacy (it will help if you say where your cylinder or headset came from originally).

And if you can't return your cylinders or headsets yourself - please ask someone to return them for you.

Thank you.
